Flex expert
Flex old BC3
(b) Transfer is tolerant of tracking error
Last observed receiver fraction (%)
X: expert IK abort at 12.35 s
100% transfer does not bypass full-horizon gate
(c) Small motion during short landing window
Receiver path during bulk landing (mm)
42 mm cavity radius
Green: at least one prescribed push overlaps
Path length is not tracking error.
(d) Preselected seed 56001: timing
Blue: first source <90% → receiver ≥90%
Amber: prescribed push interval
Native time (s)
(e) Frozen old BC3 feedback error
Delayed goal-position error norm (mm)
